

Nordic Game

Presentation of the French
delegation

Presentation

From May 26 to 29, 2026, a French delegation of game studios will take part in Nordic Game in Sweden, as part of the **Games Made in Satellites initiative**. This program is organised by the **French Institute in Sweden, Capital Games and Business France**.

Designed to foster international collaboration and business development, the initiative offers selected studios a tailored, high-impact program in the heart of one of Europe's leading game industry events. Supported by the **French Ministry for Europe and Foreign Affairs** and the **Institut français**, this initiative is part of France's broader strategy to promote the international growth of its cultural and creative industries.

Gamevestor

Gamevestor is the first EU-regulated crowdfunding platform enabling individuals and professionals to invest in PC and console video game projects and earn a share of their revenues. At Nordic Game, I will explore the current state of game financing, why traditional models are reaching their limits, and why the next generation of funding may need to come directly from players themselves.

Expertise : Marketing, financing, investment

Looking for : Studios

Contact : Ivan Marchand, President, Co-founder

Spill Studio

Spill Studio develops mimem.ai, an AI-powered markerless motion capture SaaS platform that turns regular video footage into production-quality 3D animation data — no suits, no markers, no specialized equipment. Our multi-camera pipeline (up to 12 cameras) delivers accuracy comparable to optical mocap systems, starting at 25€/month. At Nordic Game, we want to showcase how game studios of all sizes can integrate studio-grade motion capture into their pipeline at a fraction of the traditional cost.

Expertise : Markerless Motion Capture, AI-powered Animation

Looking for : Studios, Animation & game designer educators, Service providers, Content creators

Contact : Rémi Koenig, Founder

Play In Lab

Our company specializes in offering user research and quality support services for actors in the video game industry. We are the French industry leader in offering external support for the development and implementation of quality strategies.

Our main services are:

- Playtesting and focus groups, to consult target audiences,
- Usability & accessibility audits, to be open to everyone,
- Data analysis, to study the behavior of players,
- Quality assurance, to reach the end of each game.

Our motto is to keep the players at the heart of the experience.

Expertise : User Research, UX, Playtest, QA, DATA, Team advising, Analytics, Focus group, Survey, Game analysis, Target Study, Accessibility, Game balancing

Looking for : Publishers, Studios (Producers, Creative Directors, UR Specialists, Marketing Directors...)

Contact : Léa Ruggeri, Managing Coordinator

Kalank Games

Kalank Games is a highly agile French studio specialized in co-development, work-for-hire, and full-cycle production across mobile, PC, console, and XR. We help partners turn ambitious ideas into polished, market-ready products through fast iteration, strong technical ownership, and proven expertise in Unity, Unreal, multiplayer, live ops, and immersive content. From prototyping to release support, Kalank combines the flexibility of an independent studio with the reliability and execution standards of a seasoned production partner, since 2017.

Expertise : Co-development, work-for-hire, full-cycle

Looking for : Publishers and IP holders with co-development or work-for-hire needs - from prototyping to release support, on mobile, PC, console, and XR

Contact : Adrien Carta,
Managing director

Hectiq

Hectiq is a Bordeaux-based video game studio founded in early 2023 by four industry veterans who met working on Microsoft Flight Simulator at Asobo Studio. At Nordic Game, we're coming to present our internal IP *Painted Kingdoms*, a watercolor-aesthetic tower defense game, and to discuss co-development and work-for-hire opportunities with publishers and studios looking for an experienced team.

Expertise : Tower Defense, Indie Development, Co-Development, Work-for-Hire, Unity, Technical Performance, Network Optimization, AAA Experience, PC & Console

Looking for : Publishers, Studios

Contact : Luca Pierabella, CEO

Irregular Shapes

Irregular Shapes is an indie studio specializing in systemic city-builders, behind *City Tales – Medieval Era* (90%+ positive on Steam). At Nordic Game, we're presenting *Marbles Tree*, a survival city-builder where you build a squirrel colony across a giant living tree using highly watchable physical marble networks. We're looking to connect with publishing partners to bring the game to a wider audience.

Expertise : City-builder

Looking for : Publishers

Contact : Rémi Malet, CEO & Founder
